

## Role of Extensionist: Research Field to Farmers Field

Madhumita Naskar

### Abstract:

Generally extensionist transfer technologies from research section to farmers field after completing the research part when its confirmed that it will be more helpful to farmers rather than previous one (technologies/methods). Extensionist introduce that technologies to farmer.

### Introduction

Generally Agricultural extensionist plays a major role in agriculture industry. They use to transfer all the technologies, methods, new resources, and all the research level things which is happening in the lab or institutions or in kvk After completing all level of research when scientists are confirmed about the program they use to transfer it to the extensionist and extensionist introduce that to the farmer.

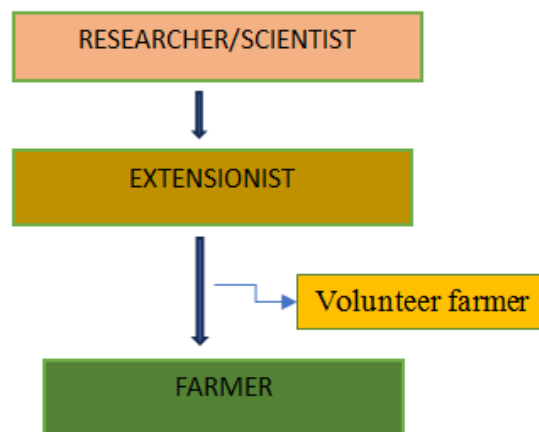

### How it works?

Researcher first use that technology in the lab or in the research field after the surety they send this to the agricultural extensionist. Then extensionist use to transfer this technology to farmers. But transfer technologies to the farmers is not that easy work in India so that extensionist use to apply various way of introducing those these things to the farmers.

### Level of working:

Before introducing to any farmer researchers make sure that beneficial for farmers until or unless. After that the confirmation extensionist introduce it to a influencer farmer who use to influence other farmer. and high-yield crops while making better use of the

AGRICULTURE

### How to connect farmers:

For connecting farmers there is various way which is follow by the extensionist. The easiest way to connecting is “Mela” once in a

year or twice in a year organizing mela which not only farmer or extensionist even though our scientist also attend this which help farmers to understanding in a better way.

### **Awareness of Farmers:**

Through this Mela people will connect directly to the extensionist and with the agriculturist also so while they communicate they will more aware of farming and they have opportunity to know more and more about the recent trends in agriculture.

### **Motivating Farmers:**

Finding a best farmer from a village and awarding them by some prize, certificate, money, etc. which is help to motivating other farmers too. Extensionist also publish some magazine and also give chance to broadcasting in radio station which is impact farmer in a huge way that's how we can motivate our farmers effectively.

### **Conclusion:**

Role of an extensionist is not possible to describe in a paper because extensionist plays a major role in our agriculture society. Because of them so many farmers are got chance to know about agriculture and new trends in agriculture and extensionist also motivate our youth for farming those who thought our agriculture society is backward. That's how extensionist contributing every single possibilities in our agriculture society

and we are Thank full to them so much for their contribution.
